

Notice
North Huntingdon Residents
GPS Mapping Project

The North Huntingdon Township Municipal Authority has contracted with KLH Engineers to conduct GPS mapping of the Authority's sanitary sewer system. The purpose of the project is to develop a comprehensive inventory and digital map of the lines and manholes.

The survey crews, in vehicles marked "KLH Engineers" will be working throughout the Township during the next several months. Residents may notice the crews as they attempt to locate manholes and lines in the Authority's easements both in and out of the roadway.

If residents have any questions about the project or the survey crews, they are encouraged to call the Authority at 724-863-2860.
